

Task 1:

```
mysql> SELECT s.student_id, s.name, m.subject, m.marks
-> FROM Students s
-> JOIN Marks m ON s.student_id = m.student_id;
```

student_id	name	subject	marks
4	Alwin	Math	80
5	Bino	Science	86
6	Sakthi	Math	75
7	Siddhart	Science	89
8	Kumar	Math	90

Task 2:

```
mysql> SELECT s.student_id, s.name, m.subject, m.marks
-> FROM Students s
-> JOIN Marks m ON s.student_id = m.student_id;
```

student_id	name	subject	marks
4	Alwin	Math	80
5	Bino	Science	86
6	Sakthi	Math	75
7	Siddhart	Science	89
8	Kumar	Math	90

Task 3:

```
mysql> SELECT student_id, total_marks
-> FROM (
->   SELECT student_id, SUM(marks) AS total_marks
->   FROM Marks
->   GROUP BY student_id
-> ) AS sub
-> WHERE total_marks = (
->   SELECT MAX(total_marks)
->   FROM (
->     SELECT SUM(marks) AS total_marks
->     FROM Marks
->     GROUP BY student_id
->   ) AS totals
-> );
```

student_id	total_marks
1	175
